- HTML
- CSS, LESS & SASS
- JavaScript
- React.js

- Angular
- REST APIs
- AWS
- Git Flow

- Agile methodology
- MySQL
- Node.js
- Adobe XD/Photoshop

PROJECTS

Cohen Restoration
Created With: React, Reactstrap, Material UI, SCSS
- Use of React hooks and functional components.
- Incorporates the use of Material UI and Reactstrap libraries.
- Freelance website for a growing, local company.

GitHub Finder
Created With: React, JSX, GitHub API, CSS
- Created with class components and uses React lifecycle methods.
- Fetches data from my personal GitHub account via the GitHub API on initial render.
- Search functionality allows for the user to search through the API for specific accounts and directly links you to profiles.
- Profile card components also render GitHub activity.

WORK EXPERIENCE

Sales Boomerang   Owings Mills, MD/Remote
Frontend Developer   *Current Employer*
- Currently overhauling the entire client facing dashboard and adding functionality as well as more Material UI based styling.
- Constantly working with Product Management to push out new and innovative new features for internal and client facing use.
- Working on getting AWS certifications since I work with it daily using Code Commit, Amplify and S3.
- In charge of a Pricing Calculator project that I created with React for the day to day use of the sales team.

SDI TDI ERDI   Stuart, FL
Web Developer   *September 2019 - January 2020*
- Updated portions of the code base written in older versions of PHP(5.4), jQuery and Bootstrap 3.
- Used time management skills to complete assigned tickets in a timely fashion.
- Daily use of tools such as, but not limited to, HeidiSQL, VS code, JetBrains phpStorm, Postman and WordPress.

EDUCATION

Lambda School (Course Overview)   May 2019
- Further education and training with Full Stack Web Development.
- Became very familiar with the use of today's most popular languages, frameworks and libraries including Javascript, React.js, Node.js, Redux, MongoDB, Java, Python etc.
- Participated in multiple Build Weeks where we were grouped up and given specific tasks(UX, FrontEnd, BackEnd and Team Lead) to simulate the structure and communication necessary for an actual work environment.

Palm Beach Code School (Course Overview)   November 2018
- Learned about various programming languages, frameworks, compilers and libraries.
  HTML, CSS, PHP, vanilla Javascript and Bootstrap to name a few.
- Created an online portfolio to showcase our understanding of said languages.
- Created a capstone project incorporating the use of all programming languages and concepts taught.
